

Hello Ellen,

I am so sorry for my delay with this response, just yesterday I have returned from Japanese trip. Yes, it was significant event for me and I could see essential positive difference between First and Second meetings. I think that innovation methodologies with TRIZ have got additional good impulse and people received a good mood for work after this symposium and discussions.

More than 150 people (with 20 foreigners from USA, UK, Germany, Korea, Russia, India, China) participated in this 3-day conference. 35 presentations including posters was discussed during this meeting . The conference had mostly practical direction of TRIZ applications and it is very difficult to select best of them because presented materials had very good level.

Val Kraev
