

ALTSHULLER INSTITUTE for TRIZ Studies Newsletter
TRIZ -- the next Evolution in Problem Solving
APRIL 2005

Dear Ellen,

Record numbers of Newsletter participants!
Last month our membership increased by 10%.
That is terrific! Keep up the good work and share this
TRIZ Newsletter with a friend. There are 1,000's of
potential subscribers who are not getting this
valuable resource. I encourage all of you to forward
your E-Newsletter to friends and get them to sign
up for the FREE monthly up dates and TRIZ news.
The goal is to have 2,000 subscribers by May 2005.

TRIZCON2005!!!

is quickly approaching. Less than 2 weeks before we
commence the learning experience of the year. Come
and learn about TRIZ from the Masters and listen
how TRIZ users have been able to solve difficult
problems for their companies. See "The Next Big
Event" for more details.

There are many new participants coming to
TRIZCON2005 in April. The list includes:
Boeing, Inter Quality Services-Germany, Intel, Iwint-
China, LG Cable, and Laboratoire de Genie Chimique-
France only to name a few. I hope that you will be
there to share our excitement for 2005 and that you
will be at TRIZCON2005.

Respectfully,
Richard Langevin
Executive Director
